Pueblo, Colorado 81005

Re: Motor Sports Park Area Signage

Dear Ms. Woods and Mr Wright:

As you are aware, in conjunction with work package S1 of the Southern Delivery System, Colorado Springs Utilities (CSU) will be burying pipe through an identified corridor near the City of Pueblo Motor Sports Park and adjacent recreation area. See attached map. Though the Project will certainly comply with applicable local requirements governing the construction activity, including those related to traffic control, noise, dust suppression and the covering of trenches, given the somewhat unique nature of the recreational activities in the area and the attendant safety risks, CSU believes it would be prudent to erect a number of warning signs in the vicinity, including outside of the construction easements. This signage would be in addition to the site security measures that involve fencing, on-site security patrols, etc., and would hopefully serve as an extra safety enhancement in light of the type and frequency of motorized traffic in the vicinity of the work being performed.

CSU will also be speaking with City and County staff in the near future concerning revegetation compliance options for this area. For the time being, however, we would like to ensure that you are in agreement with our decision on the additional signage. Should you disagree with our approach, or desire to be more closely involved in the actual placing of the signage, please notify me within the next ten (10) days.

Thank you for your assistance.

Sincerely,

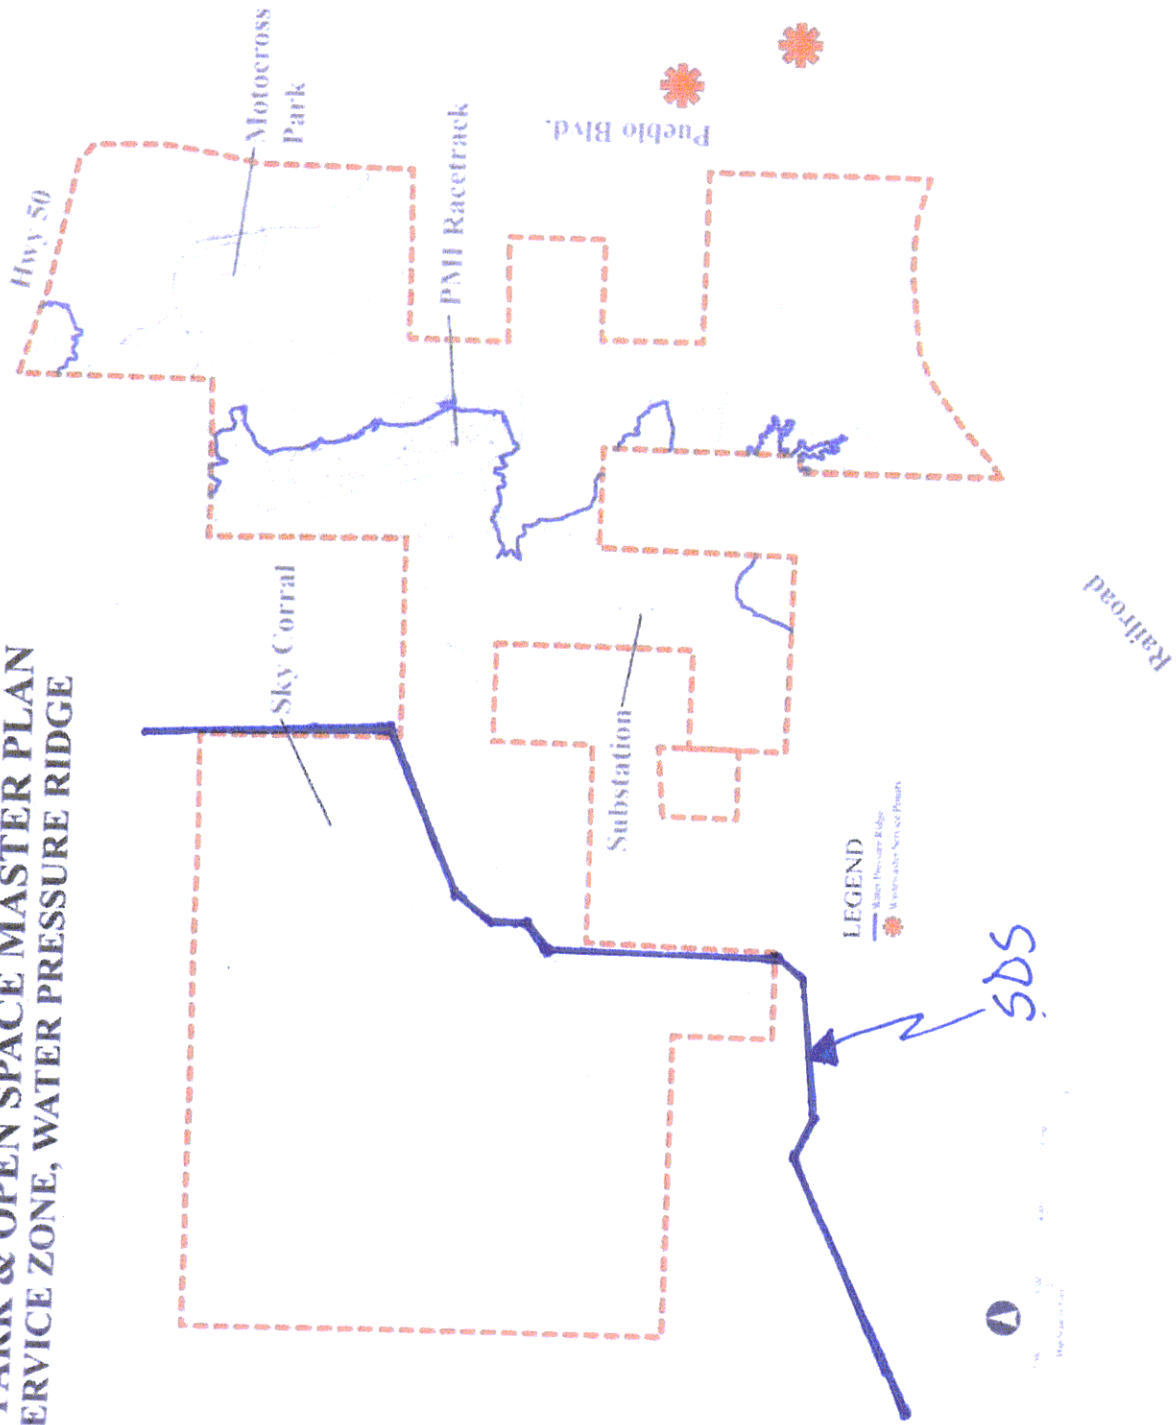

Mark T. Pipher
Manager, Permitting and Environmental Compliance
